## Languages

Dutch – native language  
English – fluently  
French – very good  
Spanish – basics

## Languages IT

Javascript(/REACT), PHP, HTML,  
CSS, MYSQL, others(GIT, SCRUM)

## Summary

Junior Web Developer experienced with all stages of the development cycle for **creative** web projects. Basic knowledge of numerous programming languages including HTML5, PHP, CSS, JavaScript, MySQL. Strong background in project management and **creative** thinking. Out of the box thinker, open minded, eager to learn and always keen for an interview! Checkout my GITHUB and my website.

## Experience

### Researcher in Automotive Engineering (2years)

Royal University of Leuven (KUL), Leuven

- Due to a collaboration between VIVES University College and KU Leuven I had the opportunity to research the effects of new methods for more sustainable catalysis in a diesel engine resulting in fewer emissions.
- Leading the research project, equipping and setting up the laboratory, supervising test runs and conditions, collecting and visualizing data with automotive software and tools such as Grafana.

### Lecturer in Automotive Engineering (Graduates) (2years)

VIVES University College, Kortrijk

- Courses: Suspension, combustion engines theory and laboratory work.
- Guiding students in their internships, follow-up on progress, maintaining business relationships with automotive businesses.
- Guiding and evaluating student-projects.

### Teacher in Automotive Technology Theory (1 year)

KTA Mobi Highschool, Ghent

- Solely responsible for all theory related courses for the seventh year concerning automotive subjects.

### Project Manager (1year)

MediaPlanet, Brussels

- Connecting the right KOL's with the right audience, thus creating an optimal environment to facilitate content marketing purposes.

## Education
